VIN :

**Optopark™** offers a new hand held parking enforcement system, providing clients with an easy-to-use, GPS-based enforcement solution that captures and uploads parking violations in real-time. The lightweight, compact system provides complete portability allowing your officers to capture & print parking violations faster than ever before.

## FEATURES:

- ☀ Violations can be printed *before* photos are taken, ensuring the most accurate documentation of each violation as it occurs
- ☀ Real-time transmission of violations & full color images to our secure server allows violator to view & pay ticket online within minutes of capture
- ☀ All our enforcement solutions come with our comprehensive back office support services, including: payment processing, customer call center, court docket preparation, correspondence printing & mailing, training & collections
