

# SENTINEL™

TRUCK HEIGHT PHOTO LASER ENFORCEMENT SYSTEM

*optotraffic*™  
innovative traffic safety solutions 

The **Sentinel™** Automated Truck Height Enforcement system utilizes our patented LiDAR-based technology to ensure that commercial vehicle traffic complies with local ordinances prohibiting or restricting truck use of certain roadways. The Sentinel™ is available in both fixed pole and portable trailer deployment configurations.

## FEATURES:

- ✦ Uses Optotrafic's patented LiDAR "Above the Road" (ATR) height sensor
- ✦ Lane specific height violations include date, time, & location
- ✦ Provides approaching and receding video clip enabling complete violation capture and replay
- ✦ Can detect front/rear plates, DOT Registrations and other Owner/Operator information

## ADVANTAGES:

- ✦ Ideal for locations where constant monitoring & enforcement is a priority
- ✦ Attaches to pole/mast by simple bracket enabling rapid deployment
- ✦ Multi-lane, lane specific enforcement, easily adjustable height limits

Optotrafic provides the same comprehensive suite of back office support services for all our enforcement systems. These include: citation printing and mailing, call center representatives, systems and software training, lockbox payment processing, pay by web, collections, court docket preparation, financial tracking and custom reporting.
